

Refrigerant News

Price Increase

Refrigerant suppliers have confirmed Prices of HCFC Blends will be increased with effect from Thursday 1st April 2010.

R134a 20%

R407C/R426A/R422D 10%

R404A/R410A/R507/R407A/R417A 5%

These increases have been caused by supply shortages from the manufacturers in Asia, American and Europe on both R134a and R125; these shortages are as a result of the 2010 use ban of Virgin HCFC's in all of Europe, leading to an increased demand in refrigerants that have both R134a and R125 as blend components.
